Course Description

This course builds on the fundamentals learned in Introduction to Microeconomics. By the end of the course, students will be able to analyze a wide variety of economic problems and understand why societies use certain tools and the limitations of those tools for economic analysis. Moreover, the tools developed in this course are very useful for upper division economics courses. Topics we will cover include behavior of households, firms and industries under competitive and monopolistic condition; factors that influence production, price, and other decisions of the firm; application of the theory of economic efficiency and distribution of well-being.

Attendance

Attendance is mandatory in the class. It would be recorded each class and forms part of students' participation record. Students should inform the instructor at the earliest opportunity if they need to ask for a leave. All absences may have negative effect on students' final grades. Any students with more than three unexcused absences will automatically fail the course.

Academic Integrity

As members of the Jinan University academic community, students are expected to be honest in all of their academic coursework and activities. Academic dishonesty, includes (but is not limited to) cheating on assignments or examinations; plagiarizing, i.e., misrepresenting as one's own work any work done by another; submitting the same paper, or a substantially similar paper, to meet the requirements of more than one course without the approval and consent of the instructors concerned; or sabotaging other students' work within these general definitions. Instructors, however, determine what constitutes academic misconduct in the courses they teach. Students found guilty of academic misconduct in any portion of the academic work face penalties that range from the lowering of their course grade to awarding a grade of E
